

Discovery Health PBR formulary and benchmark pricing for 2016 Q2 valid from 19 August 2016

PBR is a voluntarily program which is designed to additionally remunerate pharmacists for increased compliance with the Scheme's formulary. Continually rising costs creates a greater need for formulary compliance and member protection against co-payments. The formulary, together with reference price benchmarking, is necessary for the Scheme to manage cost inflation of Prescribed Minimum Benefits.

The model aims to create additional funding through added prescription price efficiency and through reduced remuneration on non-formulary items. The inclusion of a broader set of products allowed for a more affordable cross-funding mechanism.

- While prescriber preferences may compromise formulary compliance from time to time, this is adequately compensated for by lower compliance thresholds.
- Depending on the availability of preferentially priced generics, there may not always be a generic replacement item on the PBR formulary.
- Out of stock products: Please substitute with alternative formulary or benchmark items as most items do not need re-authorization. Where necessary, please obtain authorization for a replacement item by calling Add-A-Line at 0860 44 55 66.
